👍 Benefits

- Compact for shipping
- Collapsibility advantageous when replacing mounted item
- Sections fit and slide with precision smoothness
- Mounts easily to side of building using our wall mounts

💰 Selling Tips

- 5 different models from 15' to 50'
- Low cost per foot
- Ask what's being mounted. If 2.4 or 5.8 GHz antenna, can we supply?
- Suggest mounting using our NPRMs, tripods, or one of our bases: Saddle roof, angled roof, ground base plate...
- Offer guy wire
- Floating guy ring with 6 holes makes installation very flexible
- Flared sections prevent them pulling apart during installation
- VERY low per foot installation cost
- Use NPRM-1 or NPRM-2 for flat roof mount installation (guying required)
- Snap locks hold sections in place temporarily for easy 1 or 2 person installation
- Suggest our 2157, 2118 or 2124 if they are attaching to a wall
- Do we offer the frequency of antenna being mounted?
