

ISOLATED SERIES 2

Fully Isolated DC-DC Power Converters

ICT Isolated Series 2 DC-DC converters provide fully isolated high conversion efficiency, an on/off control contact to help save energy and prolong battery life, and a 2-year warranty. The Isolated Series 2 provides the benefits of full isolation at non-isolated converter price levels.

Isolated Series 2 converters can operate from a negative or positive ground electrical system, and are ideal for applications where complete isolation is necessary between primary and secondary circuits, as well as from the chassis.

Whether for a vehicle, communications tower site or off-grid power system, Isolated Series 2 converters come with the added assurance of years of proven ICT reliability and performance.

Performance and Flexibility

Models are available from 120 watts to 420 watts, in step up and step down models to match your needs. Input voltages range from 10 to 60VDC, with outputs in 12, 24 and 48VDC to cover virtually every application requirement.

Up to three Isolated Series 2 converters can be mounted in a standard 19 inch equipment rack using the ICT-RM2U rack mount accessory kit.

Low Cost of Ownership

All models come with a 2-year warranty. Minimum internal wiring and conformal coating of the electronics protects these converters from life shortening vibration and moisture.

Reliability

Reliability is achieved through careful design that virtually eliminates internal wiring and connections that can fail. Wide input voltage ranges are less susceptible to voltage spikes and drops. Every unit is extensively tested before it leaves the factory.

Energy Saving Design

A high-efficiency design means less energy is lost in the conversion process. A contact terminal is provided that allows the converter to be turned off and on by the main circuit, saving energy and avoiding standby drain on the battery.

MODEL SELECTOR GUIDE

| Input Voltage | Output Voltage | Output Current | Model Number | | |
|------------------|----------------|-------------------------------|---|--|--|
| 12VDC | 12VDC | 12 Amps 35 Amps | ICT1212-12AI2 ICT1212-35AI2 | | |
| | 24VDC | 10 Amps 20 Amps | ICT1224-10Al2 ICT1224-20Al2 | | |
