

Light Duty NPRM Products

WADE Non-Penetrating Roof Mounts are an extremely effective, transportable mounting option for flat roof installations, with no damaging roof penetration. NPRMs are quick to install, and offer reliability that matches their anchored counterparts. When selling WADE NPRM products, consider the following:

- Application
- Features
- Benefits
- Selling Tips

🔧 Applications

- P2P/P2MP ISPs
- Mesh radio networks
- WiFi outdoor (CPE/AP)
- Video security
- Commercial TV/broadcast
- Cellular network coverage extension
- Mesonets
- Construction sites
- Video surveillance
- Schools/municipal networks

★ Features

- 1/2 or full base models
- NPRM-2 has 14 gauge galvanized steel frame, while NPRM-3 uses 16 gauge
- Full base frame is 48" x 48"
- Full base models accept 1-1/2" to 2-1/2" mast
- 1/2 base model includes 5' mast
- Full base NPRM-2 uses 244A mast clamps, while the NPRM-3 uses more economical U-Bolts
- Accept both standard cinder blocks or patio stones
- Accepts WADE Pop-Up mast up to 40' (guyed)

💰 Selling Tips

- We offer full and half base models
- Can we offer the frequency of antenna being mounted?
- If more height is needed, suggest pop-up mast and our guy wire
- If they need a mast, recommend our Mastings web page
- Wind loading info available
- Stabilizing mats available
- Boxed for compact courier shipping and easy warehouse storage
- Competition base uses 16 gauge steel
- Competition base is smaller, so less stable
- Single person installation
- 4 arm mast support
- Able to support larger loads than competitors

👍 Benefits

- Easy installation
- No penetrating anchoring
- No roof damage
- Stable but also moveable
- Can be used with pop-ups for greater height
- Boxed for compact courier shipping and easy warehouse storage
