AINA Desktop Charger (5-unit) - ADC5

The AINA Desktop Charger is a five unit charging cradle specially designed for AINA PTT Voice Responder users who are looking for a simple and convenient way of managing the logistics around charging their Bluetooth speaker microphone.

KEY BENEFITS

SOLVING CUSTOMER PROBLEMS

Q: What industries would use the multi-unit Desktop Charger?

A: Industries where a large number of users return to recharge their communication devices in a dedicated place, e.g. Construction, Manufacturing, Mining, Oil & Gas, Security, Utilities, Warehousing.

Q: How does the multi-unit Desktop Charger help manage the logistics around usage and charging?

A: By installing phone and speaker mic charging racks next to each other. Workers returning from their shift can easily drop off their communication equipment for charging. It also helps to keep the phones and Bluetooth accessories together to avoid new pairings. Team leaders can see at a glance if all devices have been returned which reduces loss rates.

Q: How does the multi-unit Desktop Charger help to keep the workspace organized?

A: An organized workspace drives efficiency and the use of working equipment with care. Workers coming in from a hard shift have other things on their mind than handling cables and connecting devices. The multi-unit Desktop Charger offer a simple way to slide in the Voice Responder into a dedicated slot.

Q: How can you connect the multi-unit Desktop Charger to a power source?

A: It comes fully assembled and can be plugged into any standard power outlet

Q: Don't RSM micro-USB ports break over time?

A: Through the charging contacts are on the back of the AINA Voice Responder, the micro-USB port is not used anymore which reduces device failure rates significantly.

DESIGN

Designed for the use of mass deployments of communication solutions, the AINA Desktop Charger provides a convenient way to manage charging and asset management in the workspace.

- Sturdy and robust design
- Optimal for use in factories, warehouses, break rooms and charging stations
- Mountable on desktops or on charging racks with a standard 17 3/4" (450.85mm) width
- Keeps the workplace tidy and organized through efficient cable management
