MODELS & YEARS:  
**Bonneville 2000-2005**

### HARDWARE INCLUDED:

1-(L) Dash Panel nut #14820  
1-(E) #8x1.0 needle pt screw

### \*\* ADVISEMENT \*\*

Read instructions completely prior to starting installation. All InDash Mounts are designed so that after installation, phone is facing normal driver position for left-hand drive vehicles. This mount is not designed to be used in foreign countries with right-hand drive vehicles. Use extreme care when working around the plastic components on the dash. Excess force, can cause breakage of the plastic components.

**STEP #1** Remove (2) push type retainer clips from instrument panel bezel. These are on the top of the bezel facing downward. Remove by pushing in the center until it clicks then pull out with fingers or hook tool.

**STEP #2** Release the bezel that has (9) clips holding it on: (2) clips on the left side of steering column by small cubby; (1) between ignition switch and climate sensor (ignition cover will pop off when bezel removed); (2 each) on the top and bottom of radio and climate control; and (2) between the radio and climate control. Put the Column shifter in neutral or first gear. Disconnect wires and set bezel aside.

**STEP #3** There are (4) spring clips holding the radio on. Push them in to release radio. Pull radio out a couple of inches. Insert Dash Panel Nut (L) over center square hole. Push radio back in before installing InDash Mount, and partially put the radio bezel back on vehicle. Place InDash on the right side of radio over pin so hole where supplied clip was. Install the screw (E) through InDash into the nut.

**STEP #4** Reinstall bezel, taking care to not scratch bezel on InDash. Start from the left working your way toward the radio. Be sure to put the push type retainers back in.

**INSTALLATION IS NOW COMPLETE.  
ENJOY YOUR NEW PANAVISE INDASH MOUNT.**
